Slide Beginnings

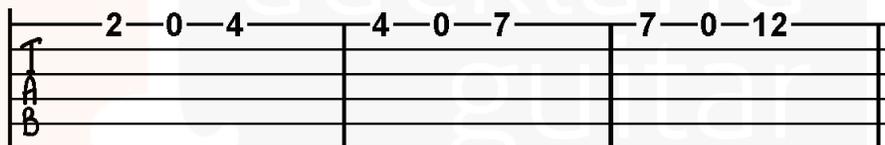

1) Play single notes on the first string:

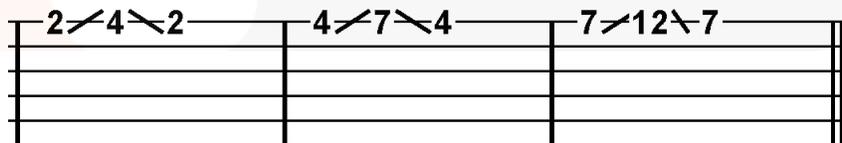

2) Slide between the notes:

3) Add an open string in between each pair of notes:

4) Then slide up-down-up, picking once each time:

Tips

Aim for notes that are

- clear (correct intonation) and
- clean (no fret noise or unwanted string noise)

Angle the slide so that all other strings can be played open

To help with intonation, it's a good idea to sound your open E string (6th) as a reference
